

Writing an algorithm

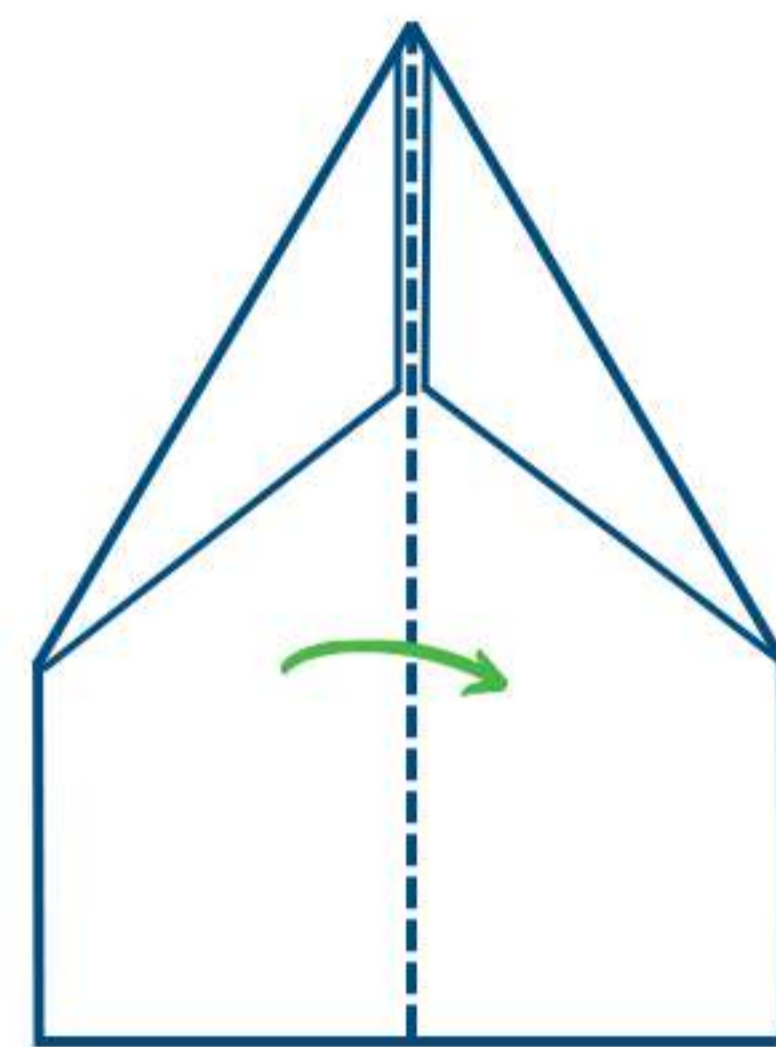

Let's build a paper plane

It's time to practice algorithms! An algorithm is a detailed step-by-step instruction for completing a task or solving a problem.

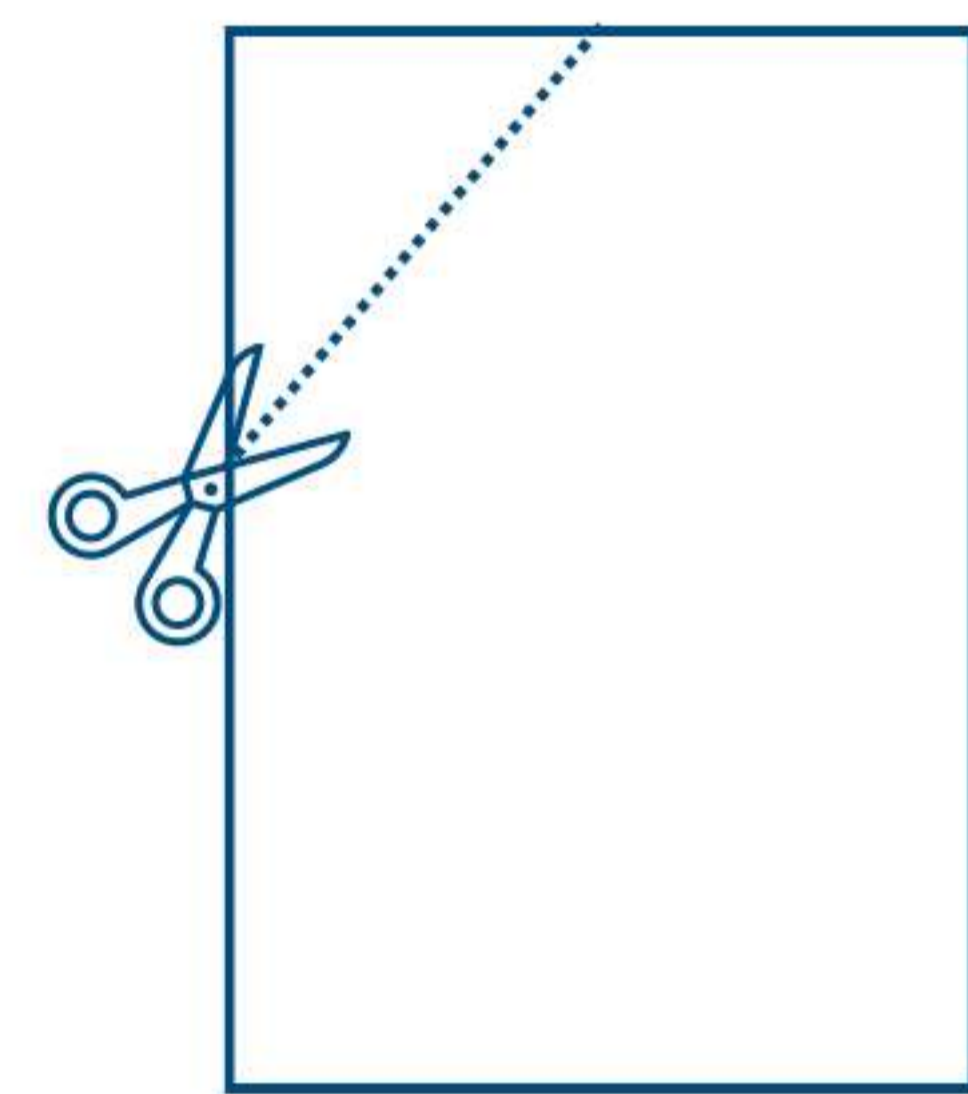

Let's build an algorithm! Cut out the steps of how to build a paper plane below. Find the six correct steps and put them in the right order. Test out if you completed the task correctly by building a paper plane! Remember to add a cool design to it.

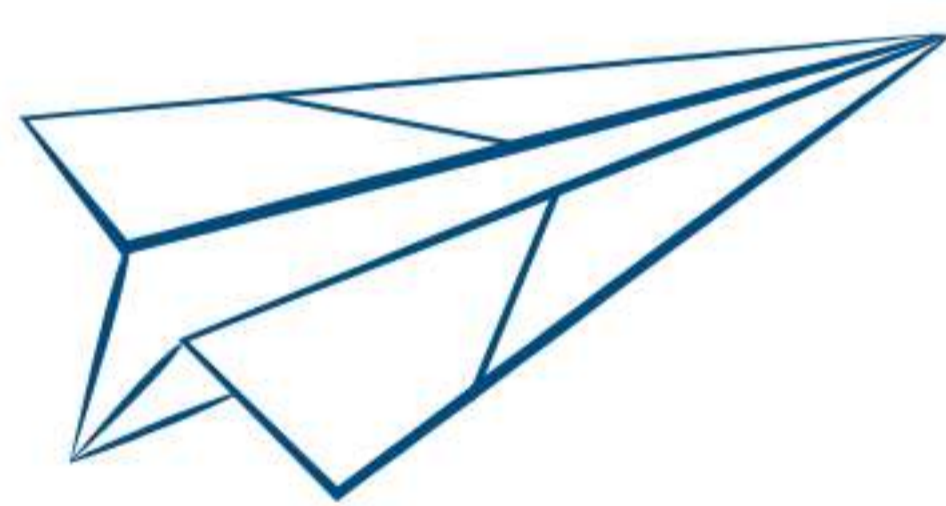

Crease paper in the middle

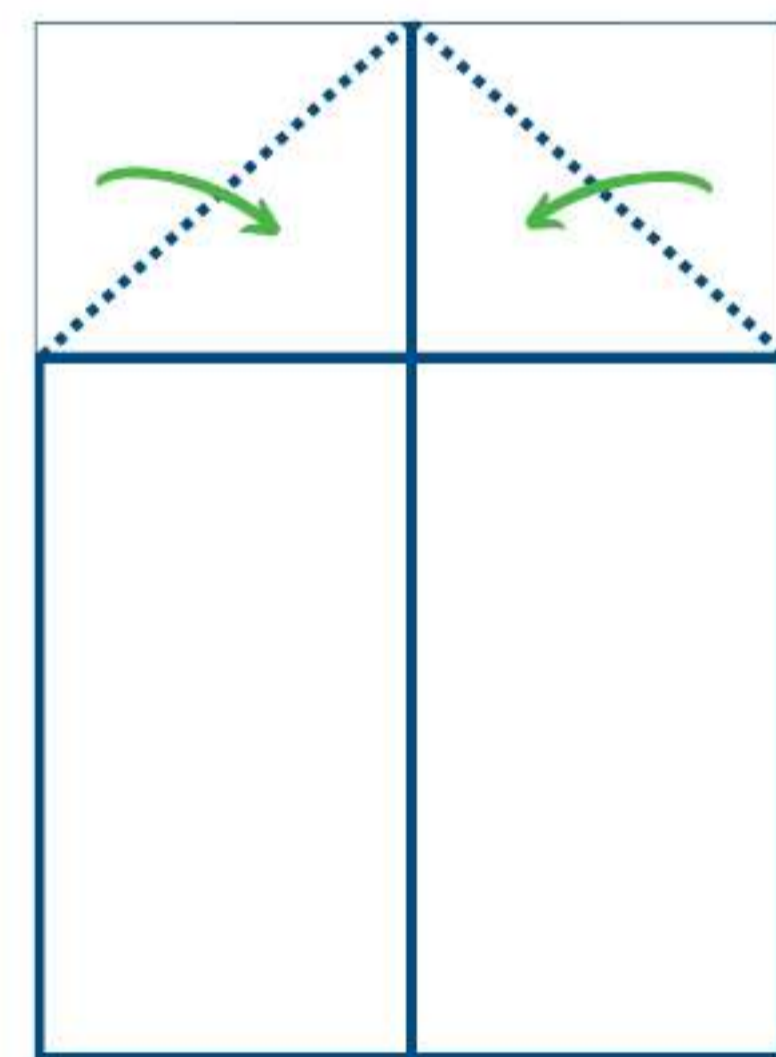

Fold in half again

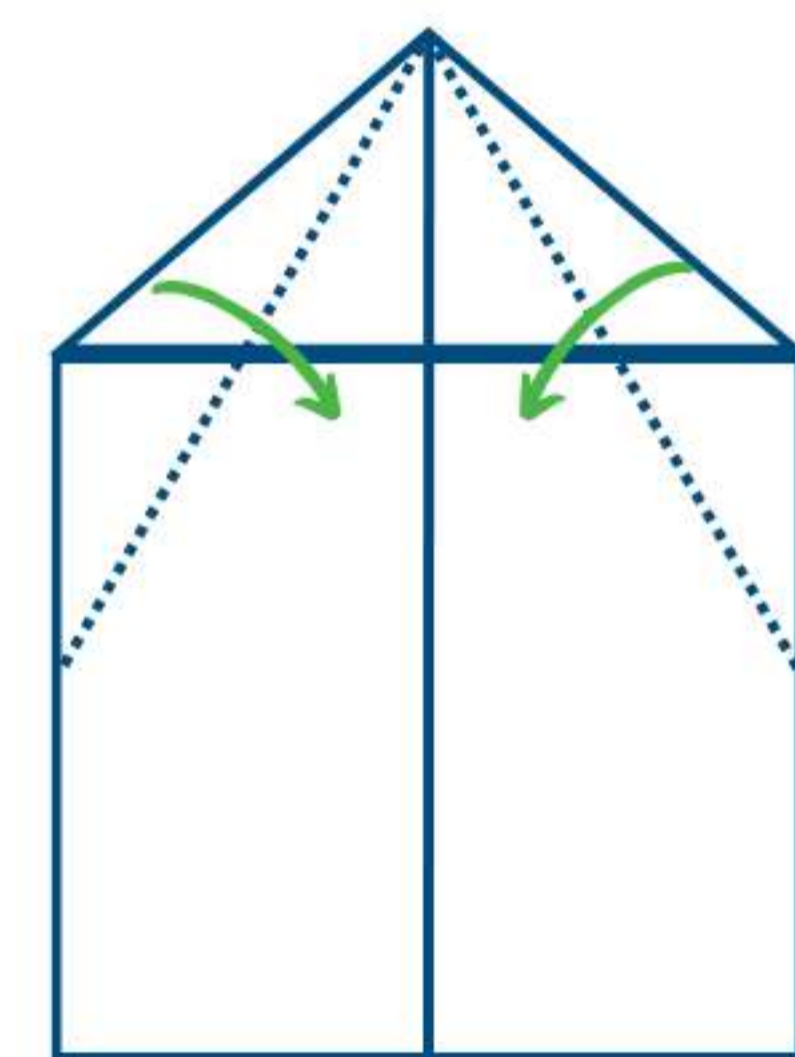

Cut out a plane

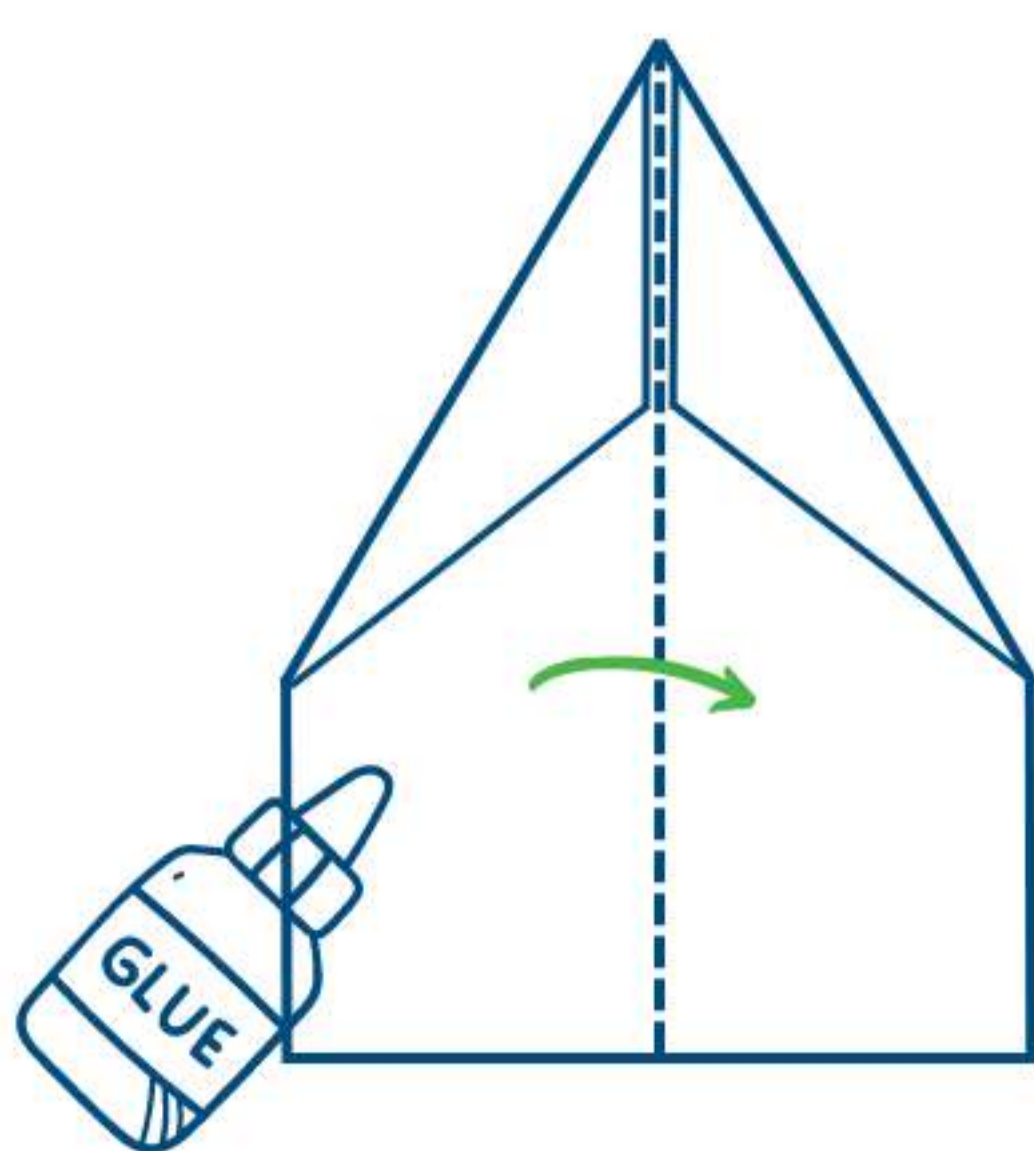

Time to fly!

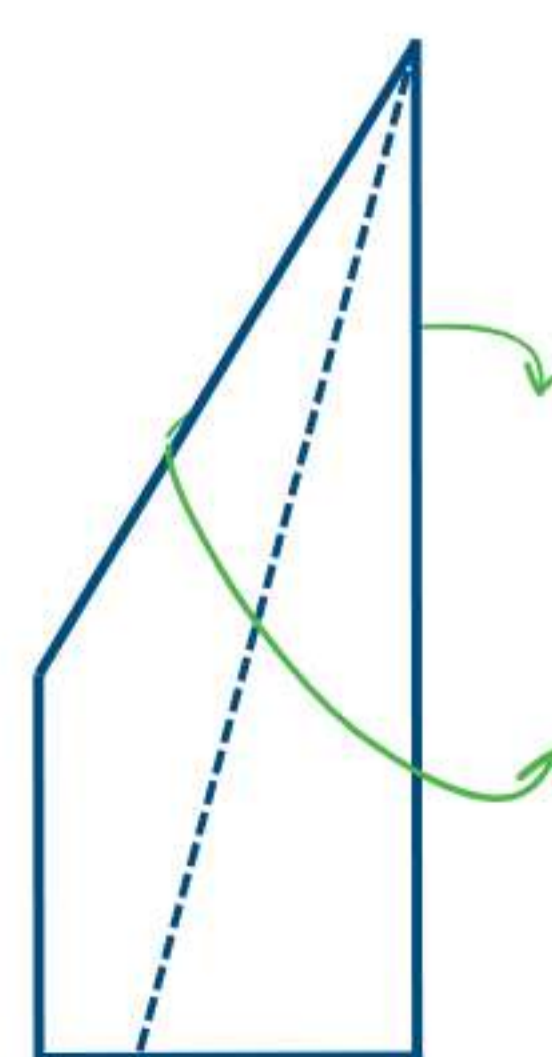

Fold top corners to center

Fold sides to center

Glue the paper in half

Fold the sides in half

Fold the plane in half
